

Robot Software

RT-Toolbox3

RT-Toolbox3 is the primary software package for Mitsubishi Electric robots that utilize CR_-500, CR_-700 and CR800 Series controllers. This software includes a comprehensive set of tools for all major robot programming and configuration tasks. RT-Toolbox3 runs on PCs with Windows® XP or later OS.

Tools include:

- System configuration
- Program edit and Debug
- Program conversion (MELFA Basic IV,V, VI)
- Parameter setting
- 3D Simulation (Standard version only) (*1)
- System monitoring
- File management
- Robot diagnostics
- Robot maintenance
