

For Immediate Release

Mitsubishi Electric's PureRide Touchless Control for Elevators Named 2022 CES Innovation Award Honoree

Cypress, Calif. (November 17, 2021) – Mitsubishi Electric US, Inc. today proudly announced that its Elevators and Escalators Division's new [PureRide™ Touchless Control](#) for elevators has been recognized as a [2022 CES® Innovation Awards honoree](#). Sponsored by the Consumer Technology Association (CTA), the CES Innovation Awards is the largest and most influential technology event in the world. Since 1967, the awards have honored breakthrough technologies and global innovators for cutting-edge consumer technology products that transform people's lives and society for the better.

[PureRide Touchless Control](#) provides a simple, no-touch product that enables users to call an elevator and designate a destination floor by placing a hand or finger over a sensor. In recent times where avoiding contact with a potentially contaminated surface or object has become a sound health practice, PureRide offers an elegant design solution that provides safety and peace-of-mind to consumers. To provide even more convenience, users can use a Touch Free Smartphone Elevator Call System application to request an elevator, resulting in less crowded waiting areas. PureRide can be quickly installed in existing elevator systems without having to add any additional conduits or alter wall finishes.

"This recognition further reinforces Mitsubishi Electric's focus on creating a more connected, sustainable smart society through consumer-facing technology that enhances personal comfort, and safety, and keeps people and business moving," said Mike Corbo, President and CEO of Mitsubishi Electric US, Inc. "PureRide Touchless Control will forever change the way we interact with and move within offices, residences, hotels, malls and other multi-story facilities."

"We designed PureRide Touchless Control with the riding public in mind," said Chris Cole, national sales and marketing manager, with the Mitsubishi Electric US, Inc. Elevator and Escalator Division. "The seamless integration of this technology into existing public spaces helps to create a more efficient environment, leading to a world where on-demand access to elevators and other amenities becomes a standard feature."

As customers' needs change and evolve, Mitsubishi Electric continuously strives to find more innovative and effective solutions to meet those needs, including PureRide Vertical Transportation Solutions.
