Nozomi Networks delivers accurate, actionable intelligence and protection for integrated OT and IoT security at scale. Their powerful platform leverages AI to deliver deep security and operational insights that empower teams to anticipate interruptions, diagnose anomalies and respond to risks.

**e-F@ctory Solutions Provided**

Nozomi Networks’ advanced monitoring, analytics and cybersecurity platform was designed to protect mission-critical environments across all industries and sectors, including today’s OT and IoT physical devices and processes. They deliver:

- Unmatched protocol coverage and comprehensive, accurate analysis of dozens of OT, IoT and IT protocols
- AI-driven insights and root cause analysis provide actionable intelligence to accelerate response or guide remediation efforts
- Proven in the largest and most complex customer environments around the world
- Unique ability to write ad hoc queries to create alerts when assets or systems are not functioning correctly
- Seamless integration with SIEM and SOC systems for closing operational visibility and security gaps
- Rigorous forensic analysis for incident response and greater insights
- Global partner ecosystem for purchasing and service needs
