### About Us

txOne Networks offers cybersecurity solutions that ensure the reliability and safety of ICS and OT environments through the OT zero trust methodology. The OT zero trust-based technologies they've developed go beyond the limitations of traditional cyber defense to streamline management, reduce security overhead, and resolve challenges faster. They offer both network- and endpoint-based solutions that integrate with the layered arrangements and varied assets common to work sites, providing real-time, defense-in-depth cybersecurity to both mission critical devices and the OT network.

### e-F@ctory Solutions Provided

txOne's solutions are designed to deploy on levels 1 (basic control), 2 (supervisory control) and 3 (site manufacturing operations and control) of the Purdue model. Their solutions conduct routine scans of stand-alone or specialized assets and conduct checkpoint scans of inbound and outbound devices with Portable Inspector, our installation-free portable scanner.

### Complementary Products

Mitsubishi Electric Communication Solutions

### Core Technology

Cyber Security

### Industries Served

Aerospace	Material Handling
Aggregates	Medical and Life Sciences
Automotive	Pharmaceuticals
Banking	Process
Financial	Tire
Services	Transportation (Air, Rail, Shipping)
Building Automation	Utilities
Food and Beverage	
Forestry and Mining Marine
