About Us

Kamet ensures successful industrial automation using AI-powered policies to maximize efficiency and prevent failures across systems, machines, and humans. We enable companies to confidently scale smart machine adoption and realize the full ROI potential of automation.

e-F@ctory Solutions Provided

Kamet AI is the first unified platform for automation efficiency that evaluates interdependencies and interoperability between systems, machines, and humans to proactively recommend actions that maximize productivity and prevent costly automation failures. Kamet AI can reduce robot setup time by over 80% and generates recommendations that maximize yields while maintaining consistently high product quality. With Kamet's predictive AI and unified management dashboard, operations teams gain immediate insights into their automation investments that translate into increased revenue.
