News Release

Mitsubishi Electric Automation Showcases “Products that Produce” at PackExpo 2012

VERNON HILLS, Ill. – Oct. 23, 2012 – [Mitsubishi Electric Automation, Inc.](#) will be demonstrating its latest line of “Products that Produce” in booth [# N4039](#) at [PackExpo 2012](#) in Chicago, Oct. 28 - 31.

On display will be Mitsubishi Electric Automation packaging and processing control technologies for machine automation, including the recently released [MR-J4 Series](#), its next generation of servo motors, servo amplifiers and motion controllers.

Demonstrations will highlight several features of Mitsubishi Electric Automation products, including:

- **Energy Savings** and the ability to save and monitor total power consumption to create smart packaging machines;
- **Gear Mesh Technology** that makes it easy to build complex machines with high-precision synchronization of multiple axes, and
- **Advanced Vibration Suppression Control** on the MR-J4 servos that reduces machine vibration and resonance of non-rigid parts.

Mitsubishi Electric Automation offers solutions for a wide range of applications including bag manufacturing; filling; high-speed feeders; vertical forming, filling and seal wrapping; labeling; winding; winding-dancer-less; cut-to-length; and RFID product tracking and tracing.

About Mitsubishi Electric Automation, Inc.

Mitsubishi Electric Automation, Inc., a US affiliate company of Mitsubishi Electric Corporation headquartered in Vernon Hills, Ill., offers a comprehensive line of factory automation solutions. Products include programmable automation controllers ([PAC](#)), programmable logic controllers ([PLC](#)), human machine interfaces ([HMI](#)), variable frequency drives ([VFD](#)), [servo amplifiers and motors](#), [motion controllers](#), [control software](#), computerized numerical control ([CNC](#)), and [Robots](#). For a broad range of factory automation applications, visit the Mitsubishi Electric Automation web site at [www.MEAU.com](#).
