INTRODUCTION

This course has been designed to explain the basic maintenance structure of the RH-3SDHR inverted horizontal Mitsubishi Electric Robot through lecture and hands on practice. The attendee will be able perform routine maintenance on the RH robot system along with learning how to properly troubleshoot the internal workings of the robot system. This class is taught with the D series type of CPU.

WHO SHOULD ATTEND?

This class is intended for maintenance individuals and those who are currently responsible for maintaining the Mitsubishi Electric RH-3SDHR robot system.
