

### **MEAU Environmental Policy**

*Mitsubishi Electric Automation, Inc. provides Industrial Automation Products, Systems, Services and Software to meet customer requirements while operating in an environmentally responsible manner. We are committed to the protection of the environment in all aspects of our operations located in Vernon Hills, Illinois. To show respect for the environment by making environmentally sound decisions is a primary management objective, the responsibility of all personnel and one of the stated values of our organization.*

*These are our environmental program principals:*

- *Comply with all legal, customer, and corporate requirements governing environmental protection. Mitsubishi is particularly mindful of managing its hazardous materials and all wastes.*
- *Conserve natural resources and minimize the creation of wastes and pollution.*
- *Strive for continual improvement and prevention of pollution by periodically reviewing company impacts to the environment and setting and reviewing objectives and targets in our environmental management system.*
- *Communicate our policy and environmental activities internally and externally and respond openly to the concerns and inquiries of interested parties.*
- *Assure that all persons working for or on behalf of the organization are familiar with and comply with specific policies, procedures and work instructions in activities that are related to environmental protection.*

*Signed*
