About Us

Bonitron designs and manufactures quality industrial electronics that improve the reliability of the process and variable frequency drives worldwide. With products in numerous industries and an educated and experience team of engineers, Bonitron has seen thousands of products engineered since 1962 and welcomes custom engineering.

e-F@ctory Solutions Provided

The Bonitron and Mitsubishi Electric collaboration provides customers with a full portfolio of Low Voltage Drive solutions. Whether using a simple single drive system or even a more advanced multi coordinated drive systems, we are able to package and offer a wide range of system solutions including overvoltage braking, such as braking transistors, resistors, and line regeneration, to undervoltage solutions, such as UPD Uninterruptible Power for drives. Leverage the industry's most reliable hardware platform with proven technology that is not only scalable but can be tailored and applied to any Mitsubishi Electric drive systems including single and 3-phase power fed systems.

Complementary Products

FR-A800 / FR-F800 / FR-E700 and FR-D700 Series, supports voltages from 110V to 690V

Core Technology

Power Regeneration
Harmonic Mitigation

Industries Served

Automotive
Material Handling
Medical & Life Sciences
Packaging
Printing
Semiconductor
Solar
