About Us

OnRobot products open new possibilities for automating tasks that you never thought possible. Our cutting edge gripping and sensing systems for industrial automation let you easily design truly collaborative applications that enable your workforce to work side-by-side with collaborative robots on assembly, surface finishing, pick and place, machine tending or testing.

e-F@ctory Solutions Provided

The OnRobot product range features a wide assortment of tools and software for collaborative applications, including electric, vacuum and magnetic grippers, the award-winning Gecko gripping technology, force/torque sensors, a 2.5D vision system, screwdriver, sander kits and tool changers. Supported by the free, Learn OnRobot e-learning platform, OnRobot makes it easy to deploy collaborative automation on tasks such as packaging, quality control, materials handling, machine tending, assembly, and surface finishing regardless of skill level or previous robotics experience.
