

Precautions for replacing MR-J2 series with MR-J4 series

1. OUTLINE

This document describes the changes that are applied to when replacing a system using the MR-J2 series with a system using the MR-J4 series. The functions and performance of the MR-J4 series are greatly improved from the MR-J2 series. The mounting dimensions for the 1 kW or less capacities are interchangeable, but the mounting screw position (pitch) for the 2 kW to 3.5 kW capacities has been changed.

2. REPLACEMENT MODEL

- This section shows the basic models recommended for replacing the amplifier and motor as a set.

<Servo amplifier dimensions>

The following table shows comparison of the MR-J2 series and MR-J4 series dimensions. The height and width of the MR-J4 series are the same or smaller than the MR-J2 series. Please note the following when replacing: The depth is larger for the 400 W and 600 W capacities. For the mounting dimensions, the 1 kW or less capacity types are interchangeable. The number of mounting screws will be changed for the 2 kW and 3.5 kW capacities.
