# iQ-R MOTION Simulator

Model Number: iQ-R MOTION SIM

The iQ-R MOTION Simulator takes advantage of our feature rich iQ-R modular PLC, MR-J4 servo amplifiers, HG Series servo motors and GT27 HMI to offer training facilities an off-the-shelf solution to meet their advanced teaching requirements.

PURPOSE

The iQ-R MOTION SIM offers advanced programming and functionality by incorporating (2) HG Series servo motors and expanded I/O capability to replicate a multitude of applications. Utilizing MELSOFT GX Works3 and GT Works3 software, students will learn to configure and program the PLC, servo drives, and HMI. Once programmed, the simulator can be cycled to validate desired performance of the servos and I/O functionality. The iQ-R MOTION simulator provides students with advanced configuration and programming capability in a full featured control platform with fast processing speeds, network and module synchronization and multi-discipline control. Students utilizing this simulator will benefit from being trained on the latest technology, and will be prepared to lead in the respective industries they tend to pursue.

Simulator Features	Simulator Benefits
All critical components integrated into a compact assembly.	Delivers a hands-on experience for instructors and students.
Control mode can be switched accordingly for position, speed or torque control.	Various parameters are easily monitored. Pre-determined position(s) can easily be programmed.
Built-in SD memory card database.	Provides recipe and data logging functionality.
Rotational speeds to 6,000 RPM. Built-in high-resolution absolute position encoder.	Enables user to easily replicate a wide variety of applications.
GX Works3 Software	Supports multiple programming languages for use in function block diagram, ladder logic, structered text and sequential function chart methods.
GT Works3 Software	This revolutionary and intuitive design environment provides host of attributes and graphical elements needed to quickly and easily develop visualization projects.

Primary Components	Website Link: Additional Information
R35B iQ-R main base unit, 5 slots	iQ-R Series Base Unit
R62P R Series PS, 100–240VAC, 5VDC 3A	iQ-R Series Power Supply
R04CPU iQ-R CPU, 40K steps	iQ-R Series CPU Overview
RD77MS2 2-axis simple motion iQ-R SSCNETIII/H	iQ-R Simple Motion Module Overview
MR-J4-10B1-RJ SRVAMP, 100W, SSCNET III/H, FL CLSD LP	MR-J4 Servo Amplifier Card Overview
HG-KR13 servo motor 100W 200VAC	HG Series Servo Motor Overview
GT2708-STBA GT27 8.4" SVGA color touchscreen, AC	GT27 Series Overview

The following provides critical dimensions and weight information.

Dimensions (WxHxD) inches: 22.25 x 14 x 9 • Weight (lbs): 25
