GX Simulator

As an option to GX Developer or GX Developer-FX, users can add this Ladder Logic Simulator (SIM) program, allowing simulation of program operation without using a PLC. This is a great way for a programmer to test the functionality of the program, before operating it on a PLC. Machine responses can be simulated and the normal ladder monitor window can be used in GX Developer or GX Developer-FX to track execution. Allows you to call a virtual PLC on a PC and debug the sequence program. Debugging can be immediately carried out after designing without waiting for the PLC input/output wiring. This feature dramatically reduces the backward engineering process. No connection cables are required for use of this program. GX Developer or GX Developer-FX must be installed prior to installing GX Simulator.

Model Number	Description	Stocked Item
GX-SIM-C1	Single user license - can be used on 1 computer at a time	S
GX-SIM-C1-SMA	SMA FOR GX SIMULATOR 1 USER LICENSE	-
GX-SIM-C5	5 user license - can be used on up to 5 computers at a time	-
CX-SIM-C5-SMA	SMA FOR GX SIMULATOR 5 USER LICENSE	-
GX-SIM-C10	10 user license - can be used on up to 10 computers at a time	-
CX-SIM-C10-SMA	SMA FOR GX SIMULATOR 10 USER LICENSE	-
GX-SIM-C25	25 user license - can be used on up to 25 computers at a time	-
